## Experience

09/2008 - Present

### **Freelance**

Denver, Colorado

Web/Graphic Designer

I have been doing freelance since September 2008. I have designed websites and print material for many different clients. I create all my websites using CSS/HTML and custom design. I create all my clients websites to meet the needs they utilize for the success of their business on the web. The print material I have done includes logos, business cards, letterhead, brochures, newsletters, wedding invitations, baby announcements, and more.

04/2008 - 09/2008

### **Indigio/Bridgeline Software**

Denver, Colorado

Web Designer

My role at Bridgeline Software was to work with a team of designers and programmers to insure quality and functionality of websites for our clients. I designed the mockups and built the markups for the clients approval as well as adjusting them to meet the clients needs and specifications. I also created several logos, printed materials and banner ads for numerous clients.

12/2004 - 04/2008

### **100 Watt Design**

Grand Junction, Colorado

Web/Graphic Designer

I was hired as an intern initially, and after my internship was done I was hired as a full time employee. At first I did print projects and then quickly learned web development. I developed websites from start to finish, as well as maintained and updated them. I worked closely with all my clients to make sure they got exactly what they envisioned and needed to make their business successful. For one of our clients in 2007 I coordinated a charity gala to raise money for orphanages. I enjoyed my job and the responsibility and challenges that came with it.
